

Lori Hack is the principal and CEO of Object Health, a management consulting group that assists health care organizations and communities with leveraging health information to improve operational efficiencies and clinical health outcomes. Among her current projects, Ms. Hack is Program Liaison for the California Privacy and Security Advisory Board on behalf of the California Office of Health Information Integrity under the direction of Secretary Belshe. She also leads efforts in organizing Health Information Organizations (HIOs) in California for Alameda, Contra Costa, Riverside and San Francisco Counties. Ms. Hack also leads Object Health's team in their work around clinic implementation of Electronic Health Records for achieving meaningful use. Previously Ms. Hack led the privacy and security efforts for the Long Beach Health Network, as well as coordinated the development of their business sustainability model.

Additionally, Ms. Hack served as Program Manager for the state technology initiative in the area of Mental Health Information Technology through the California Mental Health Services Act (MHSA). She currently serves as the Chair of the Board for the California eHealth Collaborative (CAeHC). Previously Ms. Hack served as Interim CEO for the California Regional Health Information Organization (CalRHIO) and Executive Director for Health Technology Center (HealthTech). She currently serves in her second term on the Certification Commission for Health Information Technology (CCHIT) Privacy Expert Panel, directed by Secretary Leavitt of Health and Human Services. Ms. Hack earned her BA in psychology at the University of California at Los Angeles, and her MBA from the University of Southern California.
